INDUSTRY: *Manufacturing*

ALTRONIC, INC. 712 Trumbull Avenue Girard, Ohio 44420

New Internal Auditors at Altronic, Inc.

A group of employees working at **Altronic, Inc.**, located in Girard, Ohio, completed their training on **INTERNAL PROCESS AUDITING** conducted by John Novak of KAVON International, Inc. on January 17, 2008. Their training will be used to support **Altronic's** ISO 9001:2000 certification.

During the training sessions, the concept of a process was introduced along with the four key components (inputs, activities, outputs, and measures). Techniques on how to audit each of these components were presented along with forms for documenting the findings.

Actual audits were conducted after the classroom training was completed in order to apply what was learned. The emphasis throughout the training was that the internal auditing process must add value to the organization in order to be useful.

Altronic is the worldwide leader in industrial Ignition systems for spark ignited, natural gas fueled engines, which often run continuously under difficult operating conditions in potentially hazardous areas. They also produce a wide range of digital Instruments and controllers for gas engines, compressors, and other heavy duty rotating equipment.

Altronic's Engine Controls provide air/fuel ratio control, fuel control, speed governing, and complete custom control panels to keep engines at

peak efficiency, within emissions guidelines, and fully monitored and protected.

GTI produces the patented GTI Bi-Fuel System which converts a standard diesel engine to operate on up to 70% natural gas or bio-gas, thereby reducing operating costs, extending run-time on stored diesel fuel, and reducing diesel emissions.

If your company is seeking registration or compliance to any of the Quality Management System standards such as ISO 9001:2000, ISO 16949, AS9100, ISO 17025, ISO 14001, or ISO 13485, give us a call at 888-637-9398 and let one of our Trusted Advisors help you with implementation.
